

Sub  
ai

5. An apparatus as claimed in claim 4, further

6. An apparatus as claimed in claim 2, wherein said first management information and said second management information are stored in the image storing means in relation to the image data.

8. An apparatus as claimed in claim 7, further comprising internal storing means built in said apparatus for writing at least one of said first management information, said second management information and said third management information stored in the storing medium and holding said information until said storing medium has been removed from said apparatus.

9. An apparatus as claimed in claim 1, further comprising third managing means for generating third management information representative of a list of the image files stored in the image storing means, said third management information being stored in said image storing

10. An apparatus as claimed in claim 9, wherein the image storing means comprises a storing medium removably mounted to said apparatus.

12. An apparatus as claimed in claim 1, wherein said first management information and said second management information are stored in the image storing means in relation to the image data.

14. An apparatus as claimed in claim 13, further comprising internal storing means built in said apparatus for writing at least one of said first management information, said second management information and said third management information stored in the storing medium and holding said information until said storing medium has been removed from said apparatus.

15. In an image information managing method for an processing apparatus including image storing means storing image data, the image data are managed by first management information for managing said image data, which be stored in said image storing means, on a single image basis and second management data for managing more unit images as a single image file.

16. A method as claimed in claim 15, wherein the image  
are specified by said first management information  
single unit image basis out of the image file specified  
d second management information.

17. A method as claimed in claim 16, wherein said  
d is stored in a computer as a program to be executed  
d computer.

18. A method as claimed in claim 16, wherein the image  
ing means comprises a storing medium removably mounted  
e image processing apparatus.

19. A method as claimed in claim 18, wherein said  
d is stored in a computer as a program to be executed  
d computer.

20. A method as claimed in claim 16, wherein said management information and said second management information are stored in the image storing means in addition to the image data.

21. A method as claimed in claim 20, wherein said

method is stored in a computer as a program to be executed by said computer.

22. A method as claimed in claim 20, wherein the image storing means comprises a storing medium removably mounted to the image processing apparatus.

23. A method as claimed in claim 22, wherein said method is stored in a computer as a program to be executed by said computer.

24. A method as claimed in claim 15, wherein the image storing means comprises a storing medium removably mounted to the image processing apparatus.

25. A method as claimed in claim 24, wherein said method is stored in a computer as a program to be executed by said computer.

26. A method as claimed in claim 15, wherein said method is stored in a computer as a program to be executed by said computer.
